

VIRTUAL • LIVE • HANDS-ON

FELLOWSHIP IN

RESTORATIVE DENTISTRY

# 2021 Intake Fact Sheet

## What is the Fellowship in Restorative Dentistry?

The purpose of this course is to allow patients to receive safer, better results because their dentist will be trained to become competent and confident in restorative dentistry. This course is heavily focused on skills development and involves intensive hands-on training that builds real life skills.

Knowledge without skills produces dentists who are not capable or confident to perform beautiful and safe dentistry. We build our courses around a skills-focused program that trains our learner to think critically while performing under stressful conditions.

### Four Modules

The course is made up of four restorative dentistry subjects over two years, progressively advancing your skills so you can handle a full mouth rehabilitation.

1. Posterior + Quadrant
2. Anterior
3. Veneers + Aesthetic Dentistry
4. Full Mouth Rehabilitation

## QUICK FACTS

- » 44+ total hours of hands-on training
- » 20+ international master educators as mentors
- » 3 hours of live education each week (evenings or weekends)
- » 506 CPD/CE points
- » 100% free from travel
- » 432 previous graduates

## ONLINE LEARNING MODULES

### Module 1: Posterior and Quadrant

**Assessment Points: 250 available**

#### Synopsis:

Confidently build a quadrant of composites, manage deep margin cases without fear, and use isolation to achieve consistent results for your patients.

After capturing your base level of skill, build a single crown prep on a model. Indirect Quadrant Restorative training breaks down traditional crown preps with cores, vertical crown preps, and onlay preps and temporaries into easy step-by-step processes. Explore the different types of materials used in indirect dentistry.

#### Outcomes:

- Perfect photographic skills, and master treatment planning, communication and patient management.
- Achieve successful outcomes in deep margin and difficult cases.
- Find your confidence in treatment planning indirect quadrant restorative cases.
- Master occlusion in quadrant dentistry, as well as preparation design, temporaries, impressions/scanning, and vertical preparation.

### Module 2: Anterior

**Assessment Points: 200 available**

#### Synopsis:

Build on skills learned in the previous module, and turn your focus on the aesthetic element of restorations. Master skills of how to shape anterior teeth, isolation techniques, and matrixing. Learn to restore badly damaged anterior teeth in Indirect Anterior. Tackle one of the most difficult restoration cases in dentistry: the single dark anterior tooth. Shade matching photography is explored in detail.

#### Outcomes:

- Build the perfect teeth shape for different patients.
- Master the application of local anaesthetic, isolation, preparation, matrixing techniques.
- Master matrixing and injection moulding, and confidently apply the Bioclear method of preparing.
- Create surface texturing and staining margins after composite resin.
- Master treatment planning for indirect anterior restorations.
- Confidently take impressions for diagnostic models, digital smile design, and mockups.
- Confidently apply shade matching photography.
- Master the appropriate skills required for tissue control, core build up, impressions, and scanning.

## ONLINE LEARNING MODULES

### Module 3: Veneers & Aesthetic Dentistry

**Assessment Points: 250 available**

#### Synopsis:

How to build your patients' dream smile with direct layered veneers. This challenging and exciting module dives deep into the techniques required to treat a patient's anterior teeth aesthetically using design and layered composites. Master the communication skills you require to work successfully with the lab, how to take high quality impressions, perfect smile design, patient communication, and consent. Shade matching photography continues in this section, as getting the colour right is as essential as the veneers themselves.

#### Outcomes:

- Master the skills required to create layered composite veneers.
- Perfect the steps required to create the perfect smile design, make stents, build mock-ups.
- Explore in detail the ceramic choices for veneers and prep design.
- Master tissue control and techniques for making the perfect scans and impressions.
- Master the skills required for temporisation, insertion and the bonding of veneers.
- Master treatment planning, occlusion, smile design, mockups, consent, and how to make sure you have excellent lab support.

### Module 4: Full Mouth Rehabilitation

**Assessment Points: 300 available**

**Prerequisite: You must complete and pass Modules 1-3 before starting Module 4**

#### Synopsis:

Skills acquired from the first three modules creates a firm foundation to build the perfect full mouth rehabilitation to suit the patient's needs. Master the step-by-step process, from consent to treatment, smile design, building temporaries, provisionals, mastering occlusion, and finally, implementation.

#### Outcomes:

- Effectively communicate with your patient about the many aspects of a full mouth rehabilitation.
- Effective and efficient treatment planning, identify red flag patients, and manage, plan, open and, maintain the bite.
- Identify the full mouth rehabilitation danger zone, and design post-rehabilitation care to avoid disaster.
- Feel confident to undertake the task of a full mouth rehabilitation.
- Feel confident obtaining informed consent, and discussing finances, risk management, legal obligations and money with your patients.
- Confidently build temporaries, provisionals, and rehabilitate the full mouth.

# ASSESSMENT FOR THE FELLOWSHIP IN RESTORATIVE DENTISTRY

- Assessment points that can be obtained for each module, ranging from 200 - 300 points each.
- Assessment points are weighted by the amount of time required to complete the class/module.
- Assessment points are awarded for completing tasks, exercises or case presentation, or by the standard achieved.
- The fellowship will be awarded to students who gain more than 700 points out of 1000.

## WHAT TO EXPECT...

### BUILD HAND SKILLS

Intensive hands-on training simulated to build hand skill. Practice new techniques on a model, in a risk-free and supportive environment. You get many attempts at hands-on exercises, the power is all in repetition.

### CLINICAL RELEVANCE

Each module is tied to your actual clinical practice through case presentations building excellent documentation and self review into your practice. We expect you will become tomorrow's leaders!

### CRITICAL THINKING

Learn to train the brain. Develop skills in a simulated clinical practice resulting in less stress and anxiety when you undertake the same procedure in your clinic on a real patient.

### MODERN MENTORS

Hand selected practicing master dentists who specialise in Restorative Dentistry Education, and are ready to guide you every step of the way.

### FAIL FAST

Learn to deal with failures and how to avoid them next time increasing patient safety, satisfaction, and longevity of your work.

### PASSIONATE COMMUNITY

Join a like minded network of trusted dental educators and practitioners that will keep you inspired and challenge you to evolve your career.

“The hand should be trained with high numbers of repetitions so in moments of intense stress, the body can still perform to an elite level.”

~ DR LINCOLN HARRIS

## THE UNIQUE RIPEGLOBAL TRAINING METHOD

RipeGlobal is revolutionising dental education, replacing the traditional theory-heavy system with a skills-focused curriculum which celebrates repetition under simulated conditions. RipeGlobal is the first dental education provider to feature live virtual skills training and mentoring delivered using **fail first** training methodology.

We have also integrated **human factor training** into our teaching program. When dentists are trained against exposure to stress, fatigue, unexpected and urgent conditions, their ability to produce quality outcomes under conditions similar to those in the clinic remains effective.

Visit our website for more information on our world class educators and how we create a global hands-on virtual experience at [www.ripeglobal.com/frd-enrol](http://www.ripeglobal.com/frd-enrol)

# IMPORTANT INFORMATION

## CE/CPD Points

506 Credits in total and issued at the end of each module with universal certificates.

## Tuition, Equipment + Motor Pack Payment Plan Total

USD \$24,255

AUD \$34,650

GBP £18,903

EUR €21,429

NZD \$34,659

Save 9% when you pay in full.  
Custom payment plans available.

You will need to provide your own clinical camera, instruments, and consumables. A full list can be downloaded [here](#).

## Duration

Delivered over two years.

## Dates

### 2021 Intake:

22 February 2021 - 25 November 2022

## Prerequisites

There are no prerequisites to enrol in the course. You must complete and pass Modules 1-3 before starting Module 4.

## Method of study

Virtually delivered using simulation equipment and technology.

## Enrolment

Visit [www.ripeglobal.com/frd-enrol](http://www.ripeglobal.com/frd-enrol)

# PROPOSED 2021 KEY DATES

## Please note:

These dates may vary due to timezones. These dates are subject to change prior to the start of the Fellowship of Restorative Dentistry\*. The hands-on exercises will be held on weekends during day light hours. Lectures in your time zone will be held outside of standard clinic hours. Lectures that are held in other time zones will be available within 72 hours after being held live for you to watch back in your own time. Closer to the commencement date, the final dates will be added to an electric calendar that will adapt to your timezone.
